Q. Why are fish so smart?  
A. They live in schools

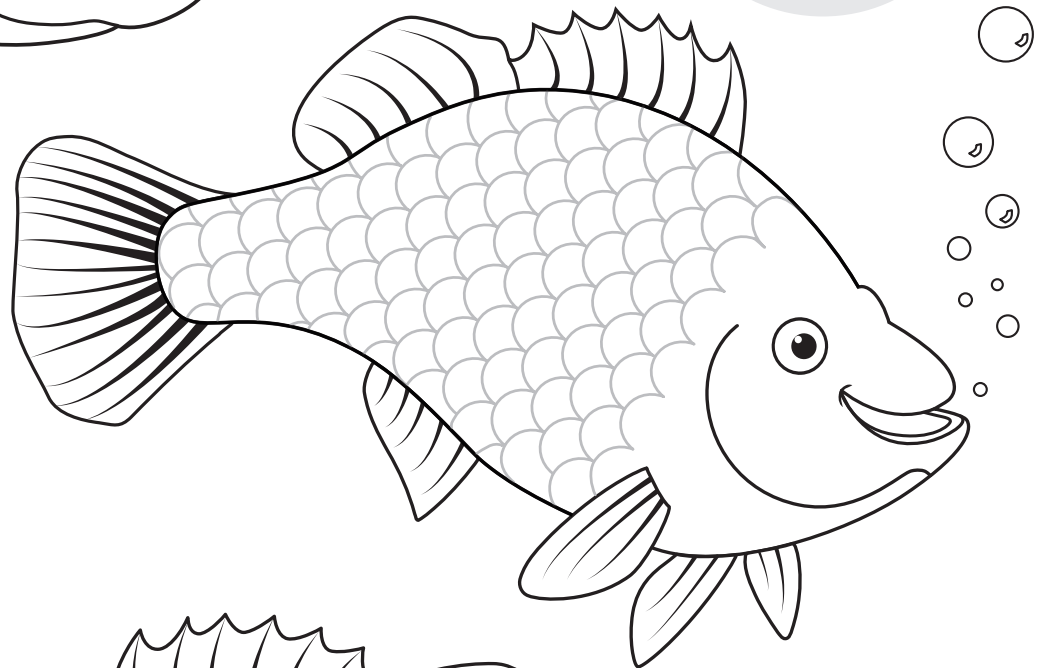

# GILLIE colour, pattern and thakala

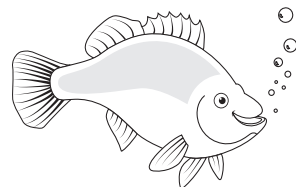

*The Baaka is home to the Golden Perch. We are commonly known as Yellowbelly. Can you guess why?*

*Golden Perch can grow up to 50 cms long and weigh up to 5 kgs.*

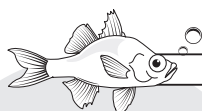

# Baaka life like *GILLIE*

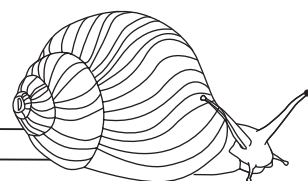

**Help these river babies follow the adults.**

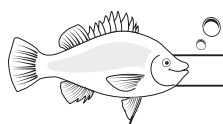

**Murray Cod are the largest freshwater fish in Australia. They can grow up to 1.8 m long.**

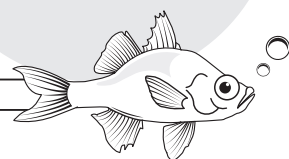

**Olive Perchlets only grow as long as your finger and are transparent.**

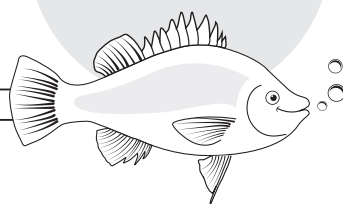

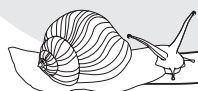

**Olive Perchlets have big eyes so they can feed at night.**

**Darling River Snails are hard to find. Their cone-shaped shells are only 1-2 cms long. They don't have legs but slide on a foot.**

**Silver Perch can grow up to 40 cm long.**

# Help **GILLIE** colour and count

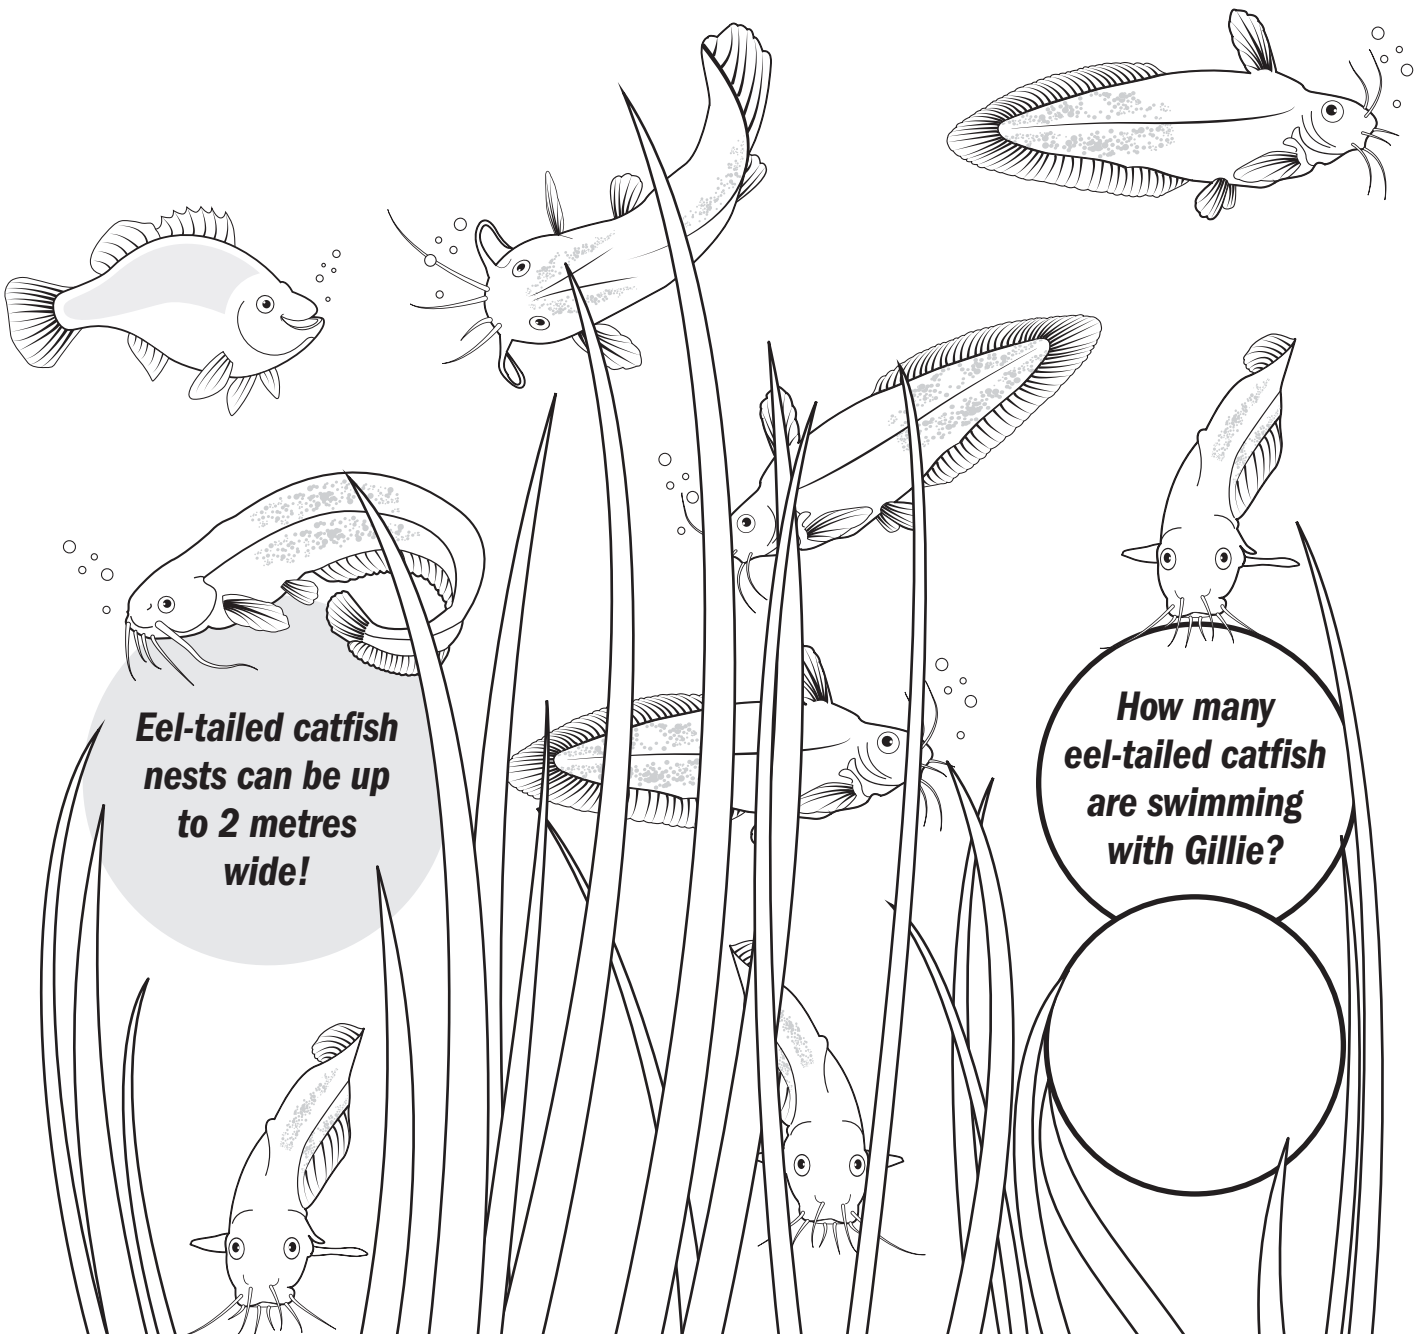

**Hide and seek is "o-fish-ally" my favourite game! Play by colouring and counting my catfish friends.**

Have you heard that the Baaka is home to eel-tailed catfish?

These freshwater fish are native to the Murray-Darling River and can grow up to 90 centimetres long. That's almost 1 metre!

How tall are you?

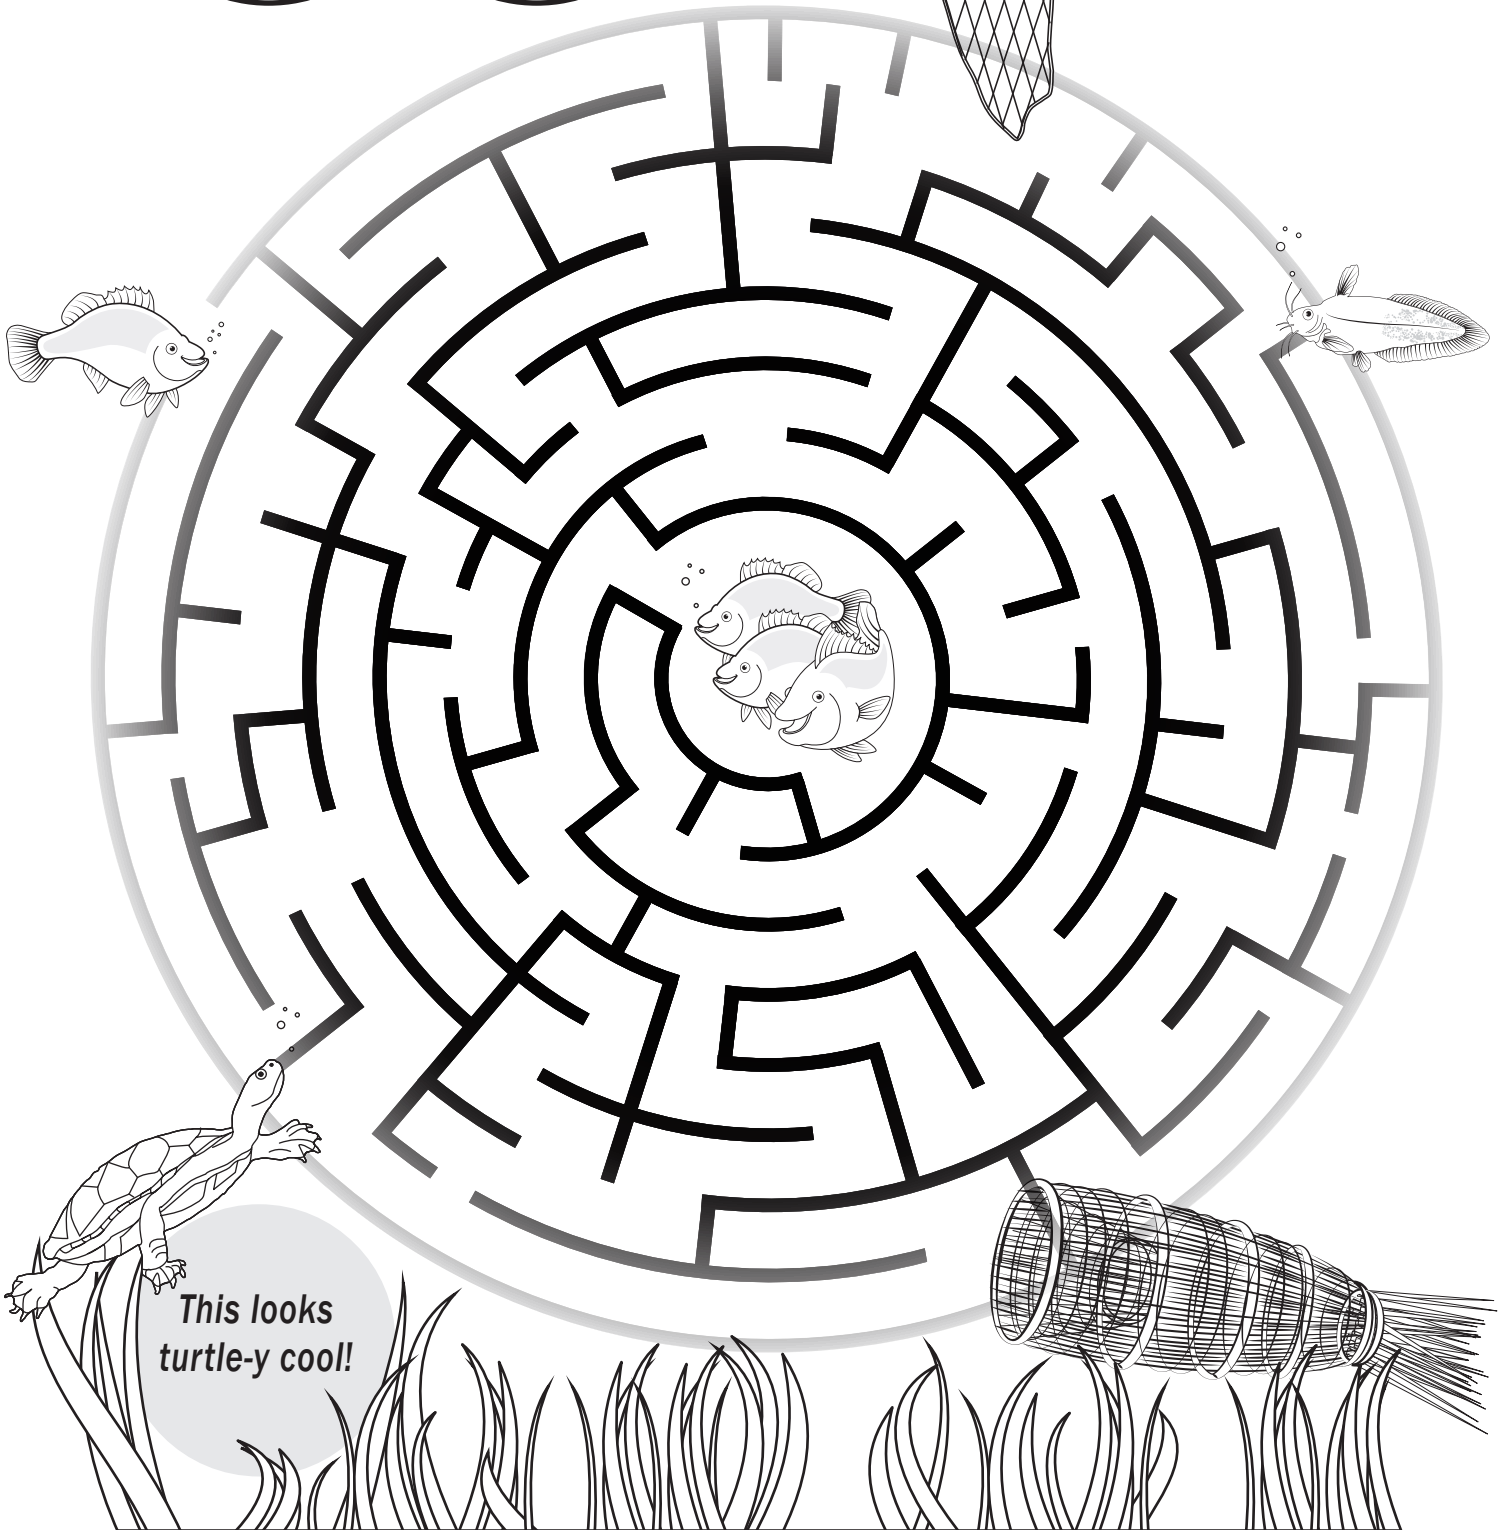

Eel-tailed catfish use small river stones and gravel to build nests for their eggs.

# GILLIE'S a-maze-ing journey

Help Gillie  
find his  
friends

and don't  
get lost on  
the way!

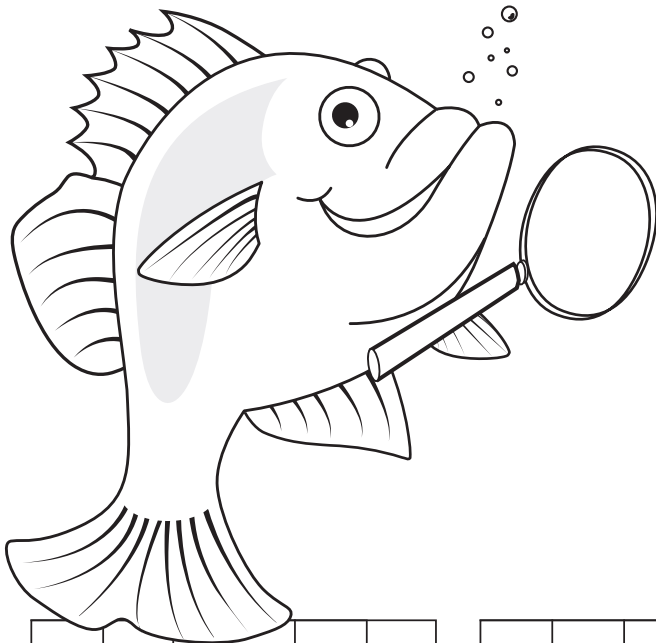

This looks  
turtle-y cool!

# GILLIE Code breaker

This page is gill-ty of too many fish puns!

Use the grid to help Gillie crack the code.

HINT  
It's Gillie's favourite saying.
