SUBMISSION - FNC Water Strategy

Good day

My name is [REDACTED], I'm 64 years old and live at Lillian Rock for over 30 years. I studied law in Germany over 40 years ago and work for the Nimbin Neighborhood and Information Centre and Nimbin Age Care in the management committee.

I honestly think the time for mega dams is over and we have to be more water wise these days.

It's so good to see that council these days supports financially the installation of rainwater tanks for the use for toilet flush and washing machines. These financial initiatives could be extended to collecting grey water in tanks.

I believe that we need a huge education campaign to change consumer behavior beginning in schools about appropriate water use as well to mulch use and lawn care.

After the huge loss of vegetation through the recent fires we should not destroy a very special and seldom rainforest.

After the destruction of the 46000 year old caves in WA, I feel that we have to be more respectful to cultural indigenous sites.

I appeal to your wisdom and believe that there are better options out there to reduce water use and gain more water catchment.

With best wishes

[REDACTED]
