centres, towns and communities in a changing climate	resilience of aquatic and floodplain ecosystems	Addressing barriers to Aboriginal people's water rights and access	Supporting agriculture and emerging industries	
Neither agree nor disagree	Strongly agree	Strongly agree	Disagree	<p>1. Many of the key regional centres are fed by the regulated river system. There is a need to consider off stream infrastructure, where continued population growth should be encouraged, and the use of recycled water for some areas. Some of the drivers for population movement to larger regional centres is happening for reasons outside those associated with water allocation</p> <p>2. There are significant environmental assets (such as protected areas) that have no specific water allocation and the Wentworth group of Scientists have shown current environmental water volumes are inadequate</p> <p>3. Water is an essential part of Aboriginal people's culture and heritage. Yet water planner continue to restrict what can be regarded as cultural water and seek to impose European ideas of representative stakeholder democracy framework on their involvement</p> <p>4. Markets will always drive the most efficient use of water for productive uses and this should be encouraged</p>
