* To what extent do you agree or disagree that these are the key water-related challenges for the Mu - Challenge 1: Ensuring resilient water supplies for regional centres, towns and communities in a changing climate	* To what extent do you agree or disagree that these are the key water-related challenges for the Mu - Challenge 2: Improving the health and resilience of aquatic and floodplain ecosystems	* To what extent do you agree or disagree that these are the key water-related challenges for the Mu - Challenge 3: Addressing barriers to Aboriginal people's water rights and access	* To what extent do you agree or disagree that these are the key water-related challenges for the Mu - Challenge 4: Supporting agriculture and emerging industries	Please outline the reasons for your answers to the previous question.
Disagree	Agree	Strongly disagree	Strongly agree	It is a nonsense to make wide sweeping motherhood statements. Aboriginal people have no more or less rights to use water than anyone else. Irrigation and other industries who use water provide stability and economic opportunity to everyone to suggest these industries are not environmentally sustainable is simply wrong because if they are not environmentally aware then they won't survive

<p>The biggest impediment to improving the Murrumbidgee system is the centralised control of its management I can't remember the last time Water NSW spent any money or did anything to improve the system. Once upon a time there was actually people in the region whose job was to repair and manage the infrastructure now there is nobody. There are comprehensive plans gathering dust that suggested improvements that are up to 40 years old but still relevant. When is someone going to get off their butt and do something.</p>
