## Weir Renewals on the Darling

## About the Better Baaka Program

The NSW Government is investigating a range of measures for the Darling-Baaka River system as part of rescoping the Menindee Lakes project. These measures are part of a new Better Baaka program (the program).

Following the Murray-Darling Basin Ministerial Council meeting in April, Water Infrastructure NSW has rescoped the Menindee Lakes Sustainable Diversion Limits Adjustment Mechanism (SDLAM) project and investigated options that might be supported by the community.

Our focus over the past few months has been evaluating the years of community feedback regarding the need to improve connectivity, environmental, cultural and community outcomes.

We know these issues can only be addressed by taking a holistic, system-wide approach to water infrastructure planning and operations, working in tandem with changes in water policy and strategy. We also know that feedback from our stakeholders and communities is critical to ensuring we progress the best options for delivering outcomes.

We have recently launched a major consultation and engagement program which will enable us to work side-by-side with communities to investigate solutions to create a Better Baaka. This is a shift towards beneficial outcomes for communities and the environment.

The options are currently being investigated by the project team, most of which are in the very early stages of planning. Community feedback and input will play a crucial role in shaping which initiatives are progressed, and what these initiatives look like, to deliver a Better Baaka.

## About the proposed initiative

The Weir Renewals on the Darling proposal (the proposal) would deliver improved town water security and fish passage through upgrading three existing weirs, including:

- Pooncarie Weir – by raising of weir, modifying the existing fishway and installing gates for more flexible operation
- Bourke Weir – by reconfiguring the weir, construction of a new fishway and installing a low-level outlet for more flexible operation
- Collarenebri Weir – by installing a new weir and fishway with gates.

## Potential benefits

The proposal would significantly improve the liveability of rural communities, as well as the health and ecology of the Darling-Baaka system, and increase connectivity along the river for native fish by:

- Increasing water security for regional towns
- in combination with other elements of the Better Baaka program, improving native fish access to over 2,000km of the Darling-Baaka

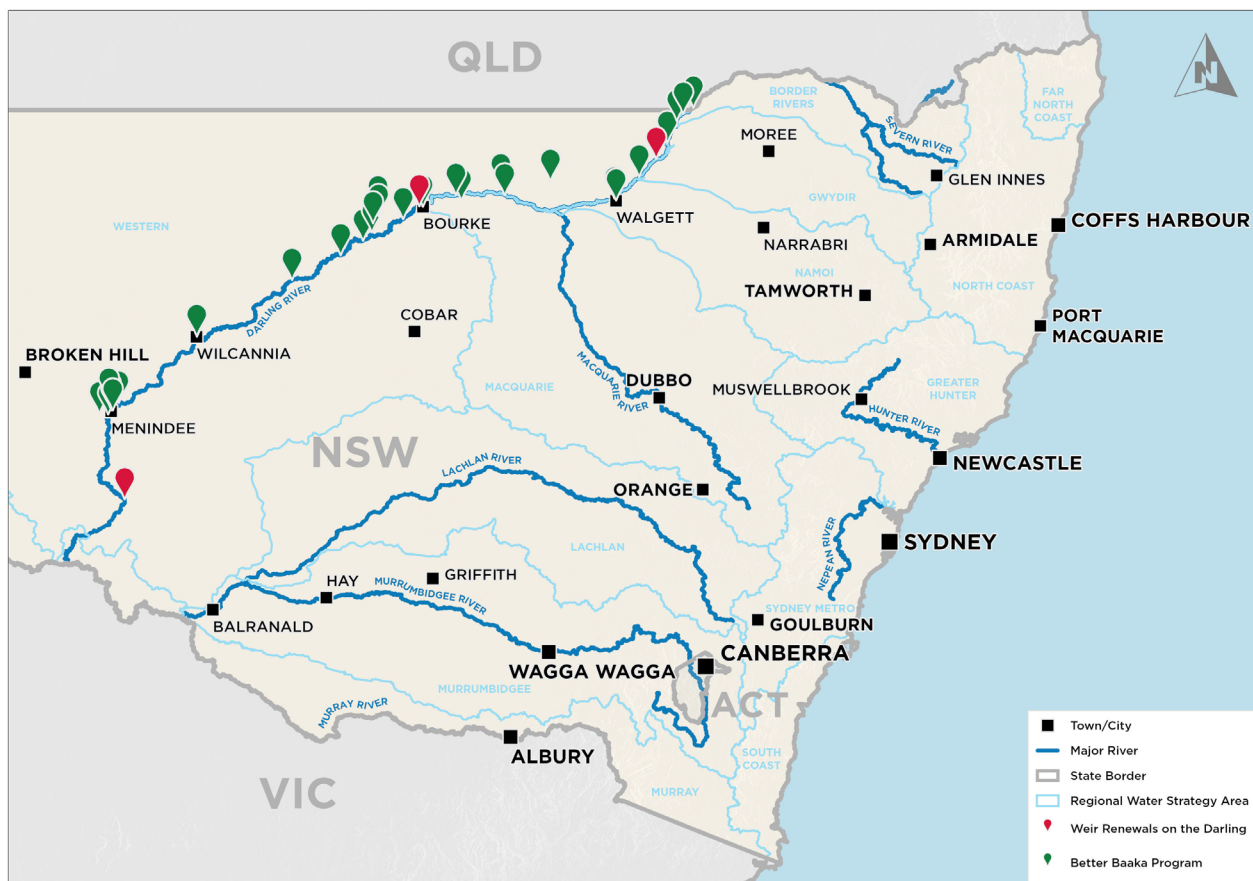

# Better Baaka Program

## Weir Renewals on the Darling

- improving the distribution and numbers of juvenile and adult native fish along the Barwon--Darling, including Golden Perch and Murray Cod
- providing enhanced flow management in the Northern Basin.

### Initiative map

The locations for the proposed Weir Renewals on the Darling are shown in the map below.

## Stakeholder engagement

Communities will be at the heart of the Better Baaka program. We are committed to working in partnership to develop the program to deliver outcomes with broad community support.

We will provide numerous opportunities for local communities and stakeholders to have their say on the design of the program and throughout the development and delivery phases of any projects. This feedback will be a key input into decision making and will help shape the program's future design.

# Better Baaka Program

## Weir Renewals on the Darling

We are also keen to hear any alternative or additional ideas local communities may have to deliver economic, cultural and environmental outcomes for local communities and the environment across the Darling-Baaka river system.

We will be reaching out to local communities soon to discuss the proposed ideas making up the Better Baaka program. Upcoming engagement and partnering opportunities will be listed on the [Better Baaka webpage](#) and also on our [stakeholder engagement page](#).

### Engagement with First Nations people

We recognise and acknowledge the unique relationship and deep connection to country that First Nations people have as the Traditional Owners and First Peoples of Australia.

The wisdom and experience of First Nations communities will play a critical role in informing the development of initiatives and approach to the Better Baaka program.

We have a dedicated engagement team who will guide our engagement with these communities, and we look forward to working with them to deliver real, tangible and widely accepted outcomes.
