

28 February 2025

# Bega and Brogo Regulated Rivers Water Source

## Water allocation update

General security (GS) allocation in the Bega Brogo Regulated Rivers Water Source have received an allocation increment of 20% of their entitlement. This increment takes the total allocation of GS licence to 60% of entitlement for the 2024/25 water year.

Extended periods of uncontrolled flow in the Bega-Brogo system this year have allowed GS water users to augment their water access. So far this water year about 2,447 megalitres (ML) has been extracted from uncontrolled flow by GS licence holders.

All other licence categories in this water source received their full allocation on 1 July 2024.

## Current allocation

28 February 2025	Allocation Increment	Average Account Balance
General Security	20%	22%

## Dam levels (as of 28 February 2025)

Brogo Dam is about 100.3% full and spilling - holding about 9,006 ML.

## Climate outlook

The Bureau of Meteorology (BoM) monthly outlook for March 2025 indicates rainfall in the Bega-Brogo catchment is likely to be above median. Maximum and minimum temperatures are likely to be warmer than median for the catchment for the same period.
