Subject: NSW draft groundwater strategy

Thank you for the opportunity to comment.

The Government is to be commended for initiating this Strategy and for the quality of the draft and supporting documents. Because of my own interest in the features, I am very pleased to see strong focus on GDEs.

My only suggestion is very minor:

Groundwater resources document

p52 mentions *Temperate Highland Peat Swamps on Sandstone ecological community*. For the coastal areas, the equivalent community is *Coastal Upland Swamps* and this could be added.
