NOTES

NOTE- Vulnerability maps are designed only as a guide and
may not give a precise indication at any particular site.
The maps are not intended to replace an environmental impact
assessment. The preparation necessarily involves simplification
of complex geological and hydrogeological situations.

This map should be used as a tool by planners, developers
and regulating agencies to make better informed judgements
on where to locate potentially polluting activities so as to
minimise the risk to groundwater resources.

This map should be used in conjunction
with the accompanying notes.
