**To the DEIP department and the Government Minister.**

**I am wishing to submit an appeal against the Plan for the Dunoon Dam.**

Hello to whom it may concern,

I am aware that the ecological damage that will be caused by building this dam in Dunoon is worth much more consideration and I ask you to take into account having more sustainable systems of water where possible.

We have to care about the future of our generations that are coming.

I appeal to your humanity.

As a Grandmother of seven, I'd like to think we have enough consciousness to go forward with new technologies that are already active elsewhere.

We need not to damage but value the natural world that has lived here for eons. These delicate systems are the life force of this planet, they carry a history within them and I feel we really need to respect the ways of our forefathers, this is sacred land we are talking about and they have always valued and cared for it, it's a part of them.

I urge you to look more deeply.

Regards
