SUBMISSION - FNC Water Strategy

Good Morning

As a member of Friends of the Koala, Lismore and Birdlife Australia, I am very concerned about the irreversible wildlife flora, fauna, and first nations damage that will occur if the Rous plan for Dunoon proposal goes ahead.

We owe it to future generations to find ways to preserve what is left, that is, what hasn't been destroyed in our beautiful country.

You need to listen to the scientists, first nations people and to as yet, unborn Australians and refuse to allow development which compromises the natural environment.

The Rous plan for the Dunoon Dam should be rejected and I would encourage DPIE to listen to groups that are about preserving and assisting nature, rather than groups that are for development regardless of the cost.

Thank you
