

Legend

- Proposed inundation area (10m raised)
- Proposed maximum induced surcharge level (1.5m raised)
- Lot boundary

Data Disclaimer

Inundation data were produced using predominantly 5m and 1m digital elevation models derived from Lidar data sets where the input data overlapped the higher resolution data was always used. Only parcels of land to be impacted are identified on map. Landowner may own more land than identified. Subject to detailed topographical survey.
